Profile Summary

I am an aspiring software developer with a strong passion for backend and web development. I began my journey by building **BookNook**, a book selling and exchange platform developed using **Node.js** and **MySQL** as part of a college project. This experience gave me a solid foundation in server-side development and database management.

Currently, I am advancing my skills in **Python and Django** at **Broadway Infosys**, where I've learned everything from basic to advanced Python concepts and am now actively exploring Django. Alongside my training, I've independently built several projects, including a **Student Management System**, a **Personal Finance Manager**, and a **Blog Platform**. These projects have deepened my understanding of software architecture, database integration, and writing clean, maintainable code.

I am now seeking an internship opportunity where I can apply my skills in a real-world environment, learn from experienced developers, and contribute to impactful projects.

Technical Skills

- Programming Languages: Python
- Frameworks: Django
- Database Management: SQLite
- Tools & Platforms: Git, GitHub
- Web Development Basics: HTML, CSS, JavaScript (basic)

Projects

Student Management System
A command-line-based project using Python and SQLite to manage student records.

- Built using modular code structure across multiple Python files
- CRUD operations with SQLite for storing and retrieving student data
- Includes data validation and user-friendly CLI interaction

Personal Finance Manager
Manages income and expenses from the command line, built in Python.

- Tracks transactions using SQLite
- Exports reports to CSV/JSON files
- Implements functions like adding, viewing, filtering transactions

Blog Platform (CLI-Based)
A basic blog system built with SQLite backend.

- Allows adding, updating, and deleting blog posts
- Categorizes posts and stores metadata like timestamps
- Prepares you for moving this concept to a Django web app

BookNook – Book Selling & Exchanging Marketplace
[GitHub: diwashgauli/BookNook---Minor-Project]

- Developed with Node.js and MySQL in a team setting
- Features include user registration, login authentication, and book upload
- Designed database schema for efficient book listings and user data management

---

Education

NCIT, Balkumari, Lalitpur
Bachelor's in Computer Engineering (BECE)
2019 – 2024 (Expected)

Soft Skills

- Problem-Solving
- Team Collaboration
- Communication Skills
- Time Management

Languages

- English
- Nepali
